Advanced Data Structures

USING THE GRAPHICAL USER INTERFACE

START => Generate graphs of your choice. Make new additions to the graph by selecting a type of operation from the list of operations.

SELECT A TYPE OF GRAPH

Select a type of graph in the given list. You will not be able to perform any operations until and unless a graph is chosen and generated on screen.

GENERATE GRAPH

Generate an initial graph of the type of graph chosen. You will not be able to perform any operations until and unless a graph is chosen and generated on screen.

SELECT AN OPERATION

You can either make new additions to the graph or choose to color it. If you choose to color, pick a color from the list of colors. (If no color is chosen, then default color is *null.*) You *MUST* click on **"GO"** each time you choose a certain operation.

CLEAR COLORS

Clear the graph of any colors.

CLEAR THE SCREEN

Erase all data on screen and provide a fresh canvas to work with.

EXIT APPLICATION

Quit.

HELP TOPICS => From the list of available help topics, choose any. These will be available throughout the entire session of usage.
